

 **ROLLER SHUTTER FOR ALUMINUM WINDOWS**

Our RS Roller Shutters series delivers excellent, affordable performance, offering full blackout as well as partly-opened options. Modern technology ensures additional security and convenience.

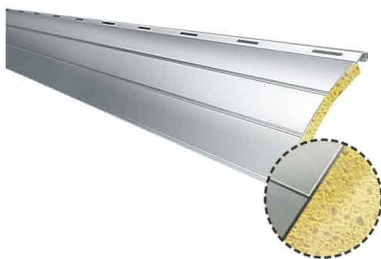

## RS ROLLER SHUTTER

FOR ALUMINUM WINDOWS

The RS system can be installed on broad window frames, up to 188 mm, with a broadening of up to 250 mm.

This system has the capability of creating a revision cover from the bottom or the front. Both manual and electric options are available, with the manual option making use of a belt-driven system, while the electric option can be operated by way of a switch or remote control. Mosquito net-equipped models effectively keep out unwanted insects, leaves, dirt, and pollen, while not sacrificing air and daylight access.

The PA-39 profile is intended for shutter use and is polyurethane-insulated. A non-perforated is available, as well as a perforated version in a variety of colors.

polyurethane-insulated
