

## INTERNAL BATHROOM DOORS

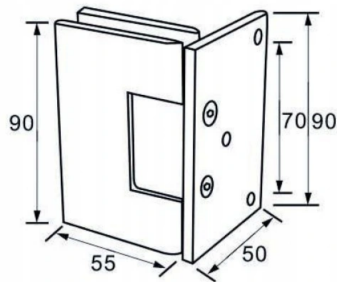

Fully glazed bathroom doors are guaranteed to keep your bathroom beautiful for many years. They can be used as shower doors due to the specialistic materials that are chosen to resist moisture/dampness. They are an easy way to achieve a clean and hygienic bathroom with modern design that will be timeless.

Precisely chosen, and solid bathroom doors will surely match even most individual project.

We offer a wide range of colours and hardware options, also RAL colours are available. For privacy levels you can choose satin or nonsatin glazing, depending on what you are looking for. Frosted glass will be perfect option for reducing the amount of light and to give obscurity to the bathrooms or bedrooms. It will create a more intimate atmosphere. Clear glazing will not reduce the amount of light and will create an illusion of a bigger, more open space.
